Blair Concrete Services is a turnkey concrete construction company serving the Southeastern United States from its headquarters in Raleigh, North Carolina.

Originally founded in 1990, we have an extensive background in industrial, commercial and institutional markets. Blair Concrete Services has been honored by several industry publications, including Southeast Construction and Concrete Construction.

## SERVICE AREA:

North Carolina, South Carolina,  
Georgia, Virginia,  
and further on request...

## Key Market Sectors

- Military/High Security
- Industrial
- Commercial
- Healthcare & Pharmaceutical
- Higher Educational & Institutional
- Power/Energy Facilities
- Parking Decks

# Featured Market Sector

## Industrial & Manufacturing

Blair Concrete Services has over 20 years experience working in this market. Our projects cover a variety of assignments including: industrial plants, research facilities, pharmaceutical plants, processing suites, laboratories, and office buildings. Our largest industrial project featured a 1.3 million square-foot facility designed with a large processing area, a shipping area, and three large storage rooms.

Some of the challenges that are involved in this market are: higher standards & requirements, high confidentiality clients, fast schedules & tight specs, super flat floors, and heavy duty foundations. With our expertise, we are able to meet and exceed our clients' expectations.

### Concrete Scope Features:

- ◆ Forming & reinforcement
- ◆ Flatwork finishing services
- ◆ Foundations & walls
- ◆ SOG, SOMD
- ◆ Auger cast piles
- ◆ Building Ground Grid System
- ◆ Excavation
- ◆ Equipment pads
- ◆ Freezer slabs
- ◆ Special toppings

# Featured Market Sector

## Healthcare & Pharmaceutical

### Our Capabilities:

- Foundations
- Slabs / Finishing
- Structural Concrete
- Tilt-Up Construction
- Forming / Walls
- Parking Garages

Blair Concrete Services has over 20 years experience working in the healthcare and pharmaceutical market. Our projects cover a variety of assignments including central energy plants, surgery facilities, hospital additions, women & children's hospitals, physician office buildings, medical office buildings, biotech labs, vaccine manufacturing plants, linear accelerators, laboratories, and vertical expansions.

Some of the challenges involved in performing in this market are: high tolerance projects, tight working conditions and schedules, higher safety requirements and quality standards. Our resources allow us to travel throughout the Southeast, and our ability to successfully complete projects has brought repeat business from our clients.

# Tilt-Up Concrete Construction

## TILT-UP BENEFITS:

- Architectural appeal
- Reduced construction schedules
- High degree of security
- Fire & wind resistant
- Proven durability & longevity
- Lower operating costs for owners
- Safety and high quality concrete
- Cost effective solution for withstanding high lateral loads

Tilt-Up concrete construction is a method in which concrete wall panels are cast on-site and tilted into place. This method affords owners a cost-effective, energy-efficient, durable building product with great architectural versatility and appeal. Tilt-up construction is not new. It is one of the fastest growing construction mediums available today. Since the mid-1940s it has developed into the preferred method of construction for everything from the traditional warehouse and industrial facilities to office

buildings, churches, movie theaters, schools and recreation centers. Nationwide, over 15% of all industrial buildings are Tilt-Up and more than 10,000 buildings are now constructed each year using this method. Blair Concrete Services has Tilt-Up experience in healthcare, institutional, and commercial facilities, office buildings, and warehouses ranging in size from 15,000 square feet up to 300,000 square feet. We are also a member of the Tilt-Up Concrete Associate which provides valuable resources.
